Resolved the issue causing the "search applicant" feature to incorrectly display no results	04/28/22

Workforce Administration

Summary	Date
Resolved the "VOL/INVOL termination template invalid row" error on the smart HR templates	04/29/22

Did you know: Location users can typically only see information for employees at their location but there are two screens available, to users with appropriate roles, where employees can be viewed across all locations:

- **Person Org Summary**: provides access to view all *current* organizational relationships for a person: Employee, Contingent Worker (CWR) and Person of Interest (POI). This page can be used to troubleshoot issues for employees who have multiple appointments. Note, this page does not display historical or future dated employment details. You can search by

Empl ID or name and / or last name.

- **Search/Match page:** should be used before processing a hire transaction to determine if an applicant has a prior UC relationship. Users can search by social security number, first name and last name, or date of birth and first name.
