Subject: Message from our sponsors

We have transitioned from marathon mode to sprint mode. With only a few months left prior to go-live, there’s a lot left to do, and not much time. The pace is picking up, and all of us will be narrowing our focus to do the exact things that are necessary to be successful at go-live. The IT3 testing round is in full swing and we are very grateful for the support we have received from the departments. Departmental participation in testing provides many benefits, it familiarizes the participants with the new system, helps the early adopters get up to speed, and identifies potential challenges so mitigations can be developed.

The ServiceLink tool that the departments will be using to communicate with the Shared Services Centers is being developed and we will be able to present it during the upcoming Knowledge Transfer sessions beginning in early August.

The UCR Project Team is also working with the UCPath team to build a strong collaboration model that will support our interactions going forward. Project resources, subject matter experts, central offices and others will be working out all the details necessary.

For more information on the FOM|UCPath project, please visit the website fomucpath.ucr.edu or email fomucpath@ucr.edu.
